EDUCATION

BTech Computer Science and Engineering, Bennett University, Greater Noida 2022 – 2026
CGPA: 8.70
Shalom Hills International School 2020 – 2022
Grade XII: 90% | Grade X: 91%

INTERNSHIP EXPERIENCE

Python Backend Developer [Python, Django, Django REST, Streamlit, Pandas] Jun 2024 – Aug 2024
Novus Insights, On-Site

- Developed a real-time chat application using Django framework and Streamlit, facilitating communication.
- Designed an executive project dashboard using Streamlit for interactive visualization of projects and Pandas for advanced data mining, enabling real-time project performance tracking.
- Contributed to the design and development of 5+ REST APIs using the Django REST framework.

ACADEMIC PROJECTS

SignSetu - Indian Sign Language Detection [Python, Mediapipe, OpenCV, Scikit-learn]

- Created and augmented dataset of 400+ images per alphabet.
- Employed ML models for accurate ISL gesture classification with 92% accuracy 26+ unique signs.

FlowMail - AI Integrated Mail System [Python, Django, Bootstrap, Google Gemini API, AJAX/jQuery]

- Built an intelligent mail platform that organizes communication within project-based workflows.
- Integrated AI-assisted email composition, draft management, and collaboration features, enhancing productivity and context-driven communication.

DermDetect - Preliminary Skin Disease Detection [Python, TensorFlow, OpenCV]

- Built and implemented an AI-driven platform for preliminary skin disease identification across 6 classes.
- Using Convolutional Neural Networks (CNNs) and Python image processing to classify skin conditions from user-uploaded images, achieving diagnostic precision 97% .

RESEARCH PUBLICATIONS

- UCD Net: Dilated Convolution-Enhanced Upsampling Fusion for Advanced Lung Disease Classification** (Published, *Multimedia Tools Applications*)
 - Proposed CNN with dilated convolutions for lung disease detection; achieved **98%+ accuracy**, outperforming ResNet50/VGG16 and other state of the art models.
- Brain Tumor Detection Using DeiT-Based Vision Transformer** (Under Review)
 - Applied DeiT Vision Transformer on MRI scans; attained **98% accuracy** for 4-class classification.
- Multimodal Emotion Recognition: A Review and Comparative Analysis of LSTM and Attention-Based Fusion Models** (Under Review)
 - Designed attention-based fusion model; outperformed LSTM baseline on MELD and IEMOCAP datasets.

SKILLS

Languages: Python | C++ | SQL | HTML/CSS
Frameworks: Django | TensorFlow | Scikit-learn | Langchain | Mediapipe
Technical Skills: Pandas | NumPy | OpenCV | Machine Learning | Deep Learning
Tools & Platforms: Git/GitHub | PostgreSQL | MySQL | Hugging Face | LLMs
Other Skills: Problem Solving | Leadership | Public Speaking | Research

ACHIEVEMENTS

- Oracle Certified Generative AI Professional** (1Z0-1127-25) — [View Badge](#).
- Amazon ML Summer School 2025:** Selected from a pool of 1 lakh+ applicants (**top 2%**).
- Competitions:** 1st place SIH 2023 (Univ. Round) | **2nd place** ACM Research Hackathon

VOLUNTEER EXPERIENCE

Research Co-Head, CSI Student Chapter Mentored a team of 10+ juniors in AI/ML research initiatives and contributed to workshops and paper development.
Research Member, Bennett AI Society Contributed to AI/ML research projects and knowledge-sharing sessions within the society.
