EDUCATION

Year	Degree/Certificate	Institute	CGPA/Percentage
2022-2026	B.Tech CSE	Bennett University	8.7
2022	CBSE(XII)	Shalom Hills International School	90%
2020	CBSE(X)	Shalom Hills International School	91%

EXPERIENCE

- Cosmofeed/SuperProfile

Jan 2026 - Ongoing

Partnership Associate

– Closed partnership deals with international creators across the US, Canada, Australia, and the Middle East for creator-led campaigns and partnership videos.

– Helped scale creator partnerships by 500% through creator outreach, negotiations, and campaign coordination with creators running Skool communities.

– Used Claude Code to streamline lead generation workflows, contributing to a 380% increase in daily SaaS signups.

• Springworks

Sep 2025 - Jan 2026

SDE Intern (Python, Zapier, GenAI, FastAPI, AWS Lambda)

– Built and deployed a production-ready service on AWS Lambda, handling repository setup, pull requests, merges, and production releases using Azure DevOps and CloudWatch monitoring.

– Developed automation workflows using Python, JavaScript, Zapier, and Portkey for grading and research tasks.

– Designed hybrid AI pipelines combining prompts with custom code and benchmarked multiple LLMs for performance and reliability.

• Novus Insights

Jun 2024 - Aug 2024

Python Backend Developer Intern (Django, Django REST, Streamlit)

– Designed a project monitoring dashboard using Streamlit and Pandas for real-time tracking of project performance and status.

– Developed and contributed to 5+ REST APIs using Django REST Framework for scalable backend services.

PROJECTS

- NeuraRAG

2025

Academic Project

– Built a custom Retrieval-Augmented Generation (RAG) system using FAISS and Sentence Transformers for efficient embedding generation and document retrieval.

– Implemented semantic search with a Django REST backend enabling scalable vector similarity retrieval and LLM-powered responses.
- FlowMail - AI Integrated Mail System

2025

Academic Project

– Developed an intelligent mail platform that organizes communication within project-based workflows using Django and Bootstrap.

– Integrated AI-assisted email composition, draft management, and collaboration features using Google Gemini API.
- SignSetu - Indian Sign Language Detection

2024

Academic Project

– Created and augmented a dataset of 400+ images per alphabet for Indian Sign Language recognition.

– Implemented machine learning models using Mediapipe, OpenCV, and Scikit-learn achieving 92% accuracy across 26+ gestures.

TECHNICAL SKILLS

- **Languages:** Python, HTML/CSS, SQL
- **Frameworks:** Django, FastAPI, LangGraph, LangChain, TensorFlow
- **Libraries:** Pandas, NumPy, OpenCV, Scikit-learn
- **Tools & Platforms:** Git, GitHub, Hugging Face, AWS Lambda, Power BI
- **Core Skills:** Machine Learning, Prompt Engineering, Data Analysis

PUBLICATIONS & CERTIFICATIONS

- **UCD Net: Dilated Convolution-Enhanced Upsampling Fusion for Advanced Lung Disease Classification** (Published)
- **Unpaired Image-to-Image Translation with CycleGAN: An Expanded Review** (Published)
- **Brain Tumor Detection Using DeiT-Based Vision Transformer** (Accepted)
- **Oracle Certified Generative AI Professional (1Z0-1127-25)**

ACHIEVEMENTS

- Amazon ML Summer School 2025, Selected from a pool of 1 lakh+ applicants (Top 2%)

2025
- Smart India Hackathon 2023, 1st Place — University Round

2023
- ACM Research Hackathon, 2nd Place

2024
